

Robert Vishal V G

Senior iOS Developer

Phone: +966 537804275

Email: vishalmichael@gmail.com | **LinkedIn:** <https://linkedin.com/in/robertvishal>

Professional Summary

iOS Developer with 9 years of experience designing, developing, and publishing native mobile applications across diverse domains like E-commerce, OTT/Media, Healthcare, and Fintech. Expert in Swift, UIKit, SwiftUI, and scalable architectures including MVVM and Clean Architecture. Proven track record of leading Agile teams, optimizing app performance, and reducing crash rates. Proficient in managing cross-platform components via Flutter and driving end-to-end CI/CD deployment pipelines.

Projects

Developed 15+ apps independently and as part of a team across OTT, E-commerce, Healthcare, Food, Travel and Social Networking domains.

European Entertainment Client

Project Description: Developed a multi-platform OTT streaming application for a European entertainment client, enabling seamless online video streaming and playback, across Android, iOS, Apple TV, Android TV, and Fire TV devices.

Tech Stack: Xcode, VSCode, Swift, Flutter, Dart, CocoaPods, Kotlin, Java

App Store Link: <https://apps.apple.com/be/app/telenet-tv/id1360986914>

Roles & Responsibilities:

- Lead the Team, Mentored junior developers, performed Code Reviews while developing and deploying the app, handling Bug Fixes and enhancements on multiple platforms such as iOS, tvOS(Apple TV), Android, Android TV and Web
- Implemented Forensic Watermarking and Deep Linking (Universal Linking)
- Utilised Firebase Crashlytics for crash reporting, Adobe Analytics, familiar with Test-Driven Development (TDD) practices
- Integrating Flutter with native iOS/Android via Method Channels, Streams and Flutter widgets.

Personal safety App

Project Description: This provides a automated, comprehensive approach to personal safety.

Tech Stack: Xcode, Swift, Cocoa Touch, Cocoa Pods, Google Map, Markers, CoreLocation, BLE, Push Notifications, SPM, GraphQL

App Store Link: <https://apps.apple.com/us/app/solo-secure-gosolo/id1608031526>

Roles & Responsibilities:

- Lead the Team, Managed Project execution, handled Sprint Planning, and coordinated Client Interactions.
- Developed, and Published the application to App Store. Implemented Biometric Authentication, Google Maps, Location Tracking, APNS, Background Task, Modularising
- Integrated Hasura, and REST APIs with Data Modelling.

Nuper

Project Description: Online Taxi booking with real-time Navigation App, enabling users to book rides, track drivers in real time, and make secure online payments.

Tech Stack: Xcode, Swift, Cocoa Touch , Cocoa Pods, MapBox, FireBase, SocketIO, Localisation

App Store Link: <https://apps.apple.com/us/app/nuper/id1499039493>

Roles & Responsibilities:

- Development, Unit Testing, Real-Time Testing, TestFlight Deployment, Appstore Publishing
- Integrated MapBox, Route Drawing, Location Tracking, SocketIO, Localisation, and REST API Integration with Data Modelling.
- Ensured code quality with Unit Tests and oversaw Project Management, including Client Communications, Sprint Planning, and Demos.

Sparrow

Project Description: It is a leading options trading platform, providing the simplest way to control risk and monetise your digital assets.

Tech Stack: Xcode, Swift, Cocoa Touch, CocoaPods, Graph, WebSocket

App Store Link: <https://apps.apple.com/in/app/sparrow-trade-bitcoin-options/id1513285139>

Roles & Responsibilities:

- UI development, Unit testing and deploy the build to Test Flight; Appstore submission.
- Integrated ChartView, WebSocket, biometric authentication, Universal Links, and reCAPTCHA.
- REST API integration and data modelling.

Popular-vehicles-and-services

Project Description: Built an automotive services platform streamlining vehicle purchasing, Maruti servicing, insurance renewals, and accessory shopping

App Store Link: <https://apps.apple.com/us/app/my-popular-vehicles/id1453987246?ls=1>

Tech Stack: Xcode, Cocoa Touch , CocoaPods, WebKit, Swift

Roles & Responsibilities:

- Design, development and deployment of App
- REST- API Integration and Data Modelling
- Unit-test code for robustness
- Publishing to AppStore.

Koloxo Homes | E-commerce App

Project Description: Developed a global property platform enabling users to buy, sell, and rent properties directly from owners, with features like property search, map view, chat, shortlisting, and ratings.

Tech Stack: Xcode, Cocoa Touch , CocoaPods, WebKit, Maps & Markers, Swift

App Store Link: <https://apps.apple.com/in/app/koloxo-home/id1460128461>

Roles & Responsibilities:

- Design, development and deployment of App(Publishing to AppStore)
- Maps, REST- API Integration and Data Modelling
- Unit-test code for robustness

E-Expo | E-commerce App

Project Description:

Developed an e-commerce platform for startups and enterprises with separate apps for customers, sellers, and delivery teams, enabling exhibition-based shopping and unified operations management

Tech Stack: Xcode, Cocoa Touch , CocoaPods, Swift

App Store Link: <https://apps.apple.com/app/apple-store/id1472052463>

Roles & Responsibilities:

- Developed individually
- Design, development and deployment of App

- REST- API Integration and Data Modelling, Localisation

PropertyExpo 2.0 | E-commerce App

Project Description:

It is an e-commerce application mainly focusing on real estate business. In the app you can search properties with location. You can buy or sell or rent a property. I have been a part of this project.

Tech Stack: Xcode, Cocoa Touch, CocoaPods, WebKit, Swift

App Store Link: <https://itunes.apple.com/us/app/propertyexpo/id1236718529?ls=1&mt=8>

Roles & Responsibilities:

- Design, development and publishing to AppStore
- REST- API Integration and Data Modelling
- Enhancement and bug fixing

Avert

Project Description:

CPI's Avert real-time GIC app shows you the up-to-date hazard conditions for Geomagnetically Induced Currents (GICs) across the United States.

Tech Stack: Xcode, Cocoa Touch, CocoaPods, WebKit, Swift

Roles & Responsibilities:

- Design, development and publishing to AppStore
- REST- API, GoogleMap, Charts Integration and Data Modelling
- Client communications, Demo

Additional Core Projects

These are some other applications in which I have worked as part of the team. These include Healthcare, Food ordering, and Social networking domains.

Portfolio Additions: Omron, EzyProcure, FROPC, Exhibiz, iResponse, Social Parrot
